18,MCQ,C

19,MCQ,B

20,MCQ,B

21,Short_Answer,"A type of ML where the model is trained on labeled data with known inputs and outputs."

22,Short_Answer,"Overfitting; the model has memorized the training data but failed to generalize."

23,Short_Answer,"A statistical process for estimating the relationships between a dependent variable and one or more independent variables."

24,Short_Answer,"Data quality/missing values, overfitting/underfitting, data collection, or time consumption."

25,Short_Answer,"Healthcare/disease prediction, Finance/fraud detection, E-commerce recommendation systems."

26,Short_Answer,"Structured is organized in rows/columns (SQL, Excel); Semi-structured has some markers but isn't in a grid (JSON, XML, HTML)."

27,Short_Answer,"Detection: Z-score, IQR, Scatter plots, Box plots. Handling: Trimming, Capping, or Imputation."

28,Short_Answer,"The steps taken to clean and transform raw data into a format suitable for a machine learning model."

29,Short_Answer,"K-NN is distance-based; features with larger scales will dominate the distance calculation if not normalized."

30,Short_Answer,"By grouping values into bins or intervals, e.g., turning ages 1-100 into 'Child,' 'Adult,' 'Senior.'"

31,Short_Answer,"The predefined number of clusters or groups the data will be divided into."

32,Short_Answer,"K in K-NN, Learning Rate, Number of Estimators/Trees, Max Depth, or Batch Size."

33,Short_Answer,"An optimization algorithm used to minimize the cost function by iteratively moving toward the steepest descent."

34,Short_Answer,"Discussion on maximizing the margin and ensuring no data points fall within the 'gutter' or margin."

35,Short_Answer,"It transforms data into a higher-dimensional space to find a non-linear decision boundary."
